DESIGN BOOK TOPCITY-1

INTRODUCTION

DESIGNTECTURE was formed in 2017 OCT with the goal of providing imaginative architectural solutions within the economic and developmental constraints of all clients. The firm believes that all projects benefit from a process involving the client, architect, builder and other specialists in an informative collaboration, and that successful projects are made possible through the management of all participants involved. We encourage this collaboration and act as a guide through the process of design and construction so that each project benefits from the participation and strengths of each team member.

Through a combination of our collaborative approach the firm can provide innovative design solutions within the context of the economic, schedule and approval constraints that are part of today's construction environment.

Our goal is to produce detailed, design oriented work on a variety of projects and to provide added value for our clients and collaborative partners by remaining focused on the architectural vision that makes DESIGNTECTURE's projects both distinctive and successful.
